K. Charles. 1625. Mar. 27. After which, writing 16. yeares.

A Description of the Foure Quarters of the Yeere, and first of Winter.

☉ in ♑, ♒, ♓.

According to the custome of writers in this kind, Winter Quarter is the first Quarter, which tooke beginning the 12 day of December, 1639. at which time the Sun entred into the first degree of the cold and dry signe Capricorne, being the most remote from us in his farthest South declination, causing the dayes with us to bee shortest, and the nights longest: which Quarter continuing untill the Sun hath slowly passed through Capricorne, Aquarius, and Pisces. This Quarter both naturally resemble Old age.

Of the Spring.

☉ in ♈, ♉, ♊.

This Quarter doth take beginning the 10 of March, at which time the Sun entreth into the first minute of Aries, and doth continue whilst the Sun is passing through these 3 vernall signes, Aries, Taurus, and Gemini. This Quarter doth resemble growing youth.

Of Summer.

⊙ in ♋, ♌, ♍.

The Summer Quarter doth take his beginning when the Sunne doth enter into the first degree of Cancer, which will be this yeere the 12 of June, and doth continue whilest the Sunne passeth through Cancer, Leo, Virgo, now are the dayes longest, and the ayre hottest, therefore, but for necessity, bid Phylicke Adieu.

Of Autumne.

⊙ in ♎, ♏, ♐

Autumne or Harvest Quarter (commonly called the Fall of the leafe, of some the Latter Spring) doth begin when the Sun doth enter into the first degree of Libra, making againe the day and the night of equall length: Which will be this yeere, the 13 of September, and doth continue whilest the Sun doth passe through Libra, Scorpio, and Sagittarius. This quarter doth fitly resemble declining age and Phlegmaticke complexion.

A briefe Chronologicall Description of many things worthy of memory, that have hapned since the Creation unto this present yeere of our Lord 1640. with the yeere of the World in which they hapned, in the first Columne, faithfully collected from many good Authors.
